Fine Arts Center

at COLORADO COLLEGE

Beginners Wall Hanging Macrame

Instructor Name: Megan Dulin

Instructor Email: megan.dulin0317@yahoo.com

Supplies can be easily found on Amazon or at your local arts and crafts store. I strongly encourage everyone to use the link provided for the cotton cord, to ensure you are getting the correct size and yardage. You may choose any of the available colors, please just be sure you are getting 4mm X 328 yards. We will not be using this entire spool, but having a large amount will ensure that you have enough cord for your project, and leave you with extra to start a new project if you wish.

Students are welcome to bring in natural sticks from trees for their project, however, please be mindful of the following... Your stick should be at least 18 inches long, straight, and smooth. You do not want a ton of knobs in the way, or it will make it difficult to work around them. This does not mean that your stick must be free of flaws, there are things we can certainly work around. If you are unsure on your stick of choice, consider bringing a dowel along with your stick as a backup just in case.

Scissors do not need to be brand new but need to be able to cut with ease. We are going to be doing a lot of cutting of cotton cord and the last thing you want is to have dull scissors that fold the cord vs. A clean cut. If you are unsure if the scissors you have a sharp enough, I highly recommend getting a new pair.

Supplies
